# EduVision DV

## Milestone 4 — Module 7: QA Checklist

**Project:** Higher Education Performance Dashboard
**Workbook:** EduVision_DV.twbx
**Purpose:** Record checks for KPI calculations, ranking calculations, dashboard interactions, educational metrics, visual consistency, and pre-publish housekeeping. The status entries reflect the testing outcomes reported during the dashboard walkthrough.

## 1. Data and KPI Accuracy

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | KPI calculations | Review the KPI cards and check that the displayed values respond to the selected dashboard filters. | Pass* | User-confirmed; raw-value comparison not attached. |
| 2 | Global ranking score / university ranking | Review the ranking visual and confirm the displayed order follows the intended ranking field. | Pass* | Ranking order reported correct. |
| 3 | Overall Score range | Check that Overall Score values are within the expected score range for the selected dataset. | Pass* | User reported KPI check passed; independent recalculation not supplied. |
| 4 | International Student Percentage | Review the metric and check that percentage values stay within 0–100%. | Pass* | User reported range check passed. |
| 5 | Faculty-to-student ratio | Check that the ratio is readable and represents the intended metric. | Pass* | User reported display/check passed. |
| 6 | Year-over-year KPI change | Change the selected year and review the displayed year-over-year change against the previous year. | Pass* | User reported check passed; manual recalculation not attached. |

## 2. Ranking Calculations

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | University ranking order | Inspect the ranking list and confirm universities appear in the expected order. | Pass* | User-confirmed. |
| 2 | Top N = 10 | Set Top N to 10 and check the resulting ranking list. | Pass | User reported expected behavior. |
| 3 | Top N = 20 | Set Top N to 20 and check the resulting ranking list. | Pass | User reported expected behavior. |
| 4 | Top N = 50 | Set Top N to 50 and check the resulting ranking list. | Pass | User reported expected behavior. |
| 5 | Ranking after Top N change | Change Top N and confirm ranking order remains correct. | Pass | User reported expected behavior. |
| 6 | Country comparison indicator | Change the selected indicator and check that the chart/leaderboard updates accordingly. | Pass | User reported expected behavior. |

## 3. Dashboard Interactions

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | Year filter | Change Year and check that related KPI cards and charts update. | Pass | User reported relevant content updates. |
| 2 | Region filter | Change Region and check related visualizations. | Pass | User reported related visuals update. |
| 3 | Country filter | Select a country and check that relevant information updates. | Pass | User reported expected behavior. |
| 4 | University selection / interaction | Select a university where supported and observe related dashboard content. | Pass* | Recorded as user-confirmed during walkthrough. |
| 5 | Dashboard navigation | Navigate through University Overview, Research Analytics, Student Analytics, Country Comparison, and Home. | Pass | User confirmed navigation works. |
| 6 | Reset filters | Change filters and use reset; check that the intended defaults return. | Pass | User confirmed. |

## 4. Educational Metrics Validation

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | Faculty-to-student ratio readability | Check that the ratio is readable on Student Analytics. | Pass* | User reported passed. |
| 2 | Gender percentages | Check that the gender percentage values appear sensible where reported. | Pass* | User reported passed; source rows not attached. |
| 3 | International student percentage | Review percentage values and ensure they remain within the expected bounds. | Pass* | User reported passed. |
| 4 | Year-over-year KPI change | Check the change indicator corresponds to the selected year and prior year. | Pass* | User reported passed; independent calculation not attached. |

## 5. Visual and Formatting Consistency

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | Consistent dashboard styling | Review the four dashboards for consistent visual styling. | Pass | User reported consistent styling. |
| 2 | Gridlines and borders | Inspect charts and worksheets for unwanted gridlines or stray borders. | Pass | User reported no unwanted lines/borders. |
| 3 | KPI readability | Check KPI values at normal viewing size. | Pass | User reported values are legible. |
| 4 | Titles and captions | Check titles and captions for truncation or overlap. | Pass | User reported no overlap/truncation. |

## 6. Pre-Publish Housekeeping

| # | Check Item | How to Verify | Status | Notes |
|---|---|---|---|---|
| 1 | Packaged workbook | Save as .twbx, reopen the file, and check that it opens successfully. | Pass | User confirmed save/reopen. |
| 2 | Dashboard tab housekeeping | Review dashboard tabs and confirm no unintended tabs remain. | Pass | User reported check passed. |
| 3 | Workbook opens without errors | Open the saved workbook and confirm no errors appear. | Pass | User reported no errors. |

**QA Summary:** All listed checks were reported as Pass during the walkthrough. Asterisks (*) identify checks that were specifically user-confirmed or whose raw numerical evidence was not attached. This checklist does not independently establish KPI accuracy above 95%; source-data comparisons would be needed to verify that target.
