

EduVision_DV — Milestone Submission Guide

Higher Education Intelligence System — complete project package

This guide separates the prepared project into Milestones 1–4 so there is no confusion about what belongs to each milestone.

Milestone 1 — Data Collection & Preparation

- Collect and retain the four project datasets.
- Validate source files and dimensions.
- Clean duplicates, missing values and numeric fields.
- Standardize university and country fields.
- Deliver raw data, cleaned data, university_raw_data.csv and collection/cleaning scripts.
- Prepared folder: Milestone_1/

Milestone 2 — KPI Engineering & Dashboard Planning

- Create the six required KPIs.
- Document KPI meaning, formula, unit and missing-value treatment.
- Prepare university_final_dataset.xlsx and KPI dataset.
- Create the data model and dashboard storyboard.
- Prepared folder: Milestone_2/

Milestone 3 — Dashboard Development

- Create the four dashboard concepts: University Overview, Research Analytics, Student Analytics and Country Comparison.
- Use Tableau-ready dimension/fact tables.
- Apply university_id and country_id relationships.
- Use filters and dashboard navigation/actions.
- Prepared interactive HTML dashboard presentation is included.
- Prepared folder: Milestone_3/

Milestone 4 — Testing, Validation & Delivery

- Validate final table sizes, duplicates and missing values.
- Provide documentation and final checklist.
- Provide reproducible validation notebook/script.
- Prepare final submission package.
- Prepared folder: Milestone_4/

What remains outside this package

1. Native Tableau .twbx: must be saved from Tableau Desktop if the instructor specifically requires a native Tableau workbook.
2. GitHub upload/commit: must be performed in the team's repository if required by the course.

Everything else is organized in the four milestone folders and the complete project root.
