

EduVision_DV

Higher Education Performance & Intelligence Dashboard

An interactive Tableau platform for exploring global university performance

Presented by ADITYA SINGH

Technology Stack

Antigravity IDE

Cloude

TABLEAU

ChatGPT

Core Features

1

Four dashboards

Overview, Research, Student and Country views

2

KPI cards

Quick high-level metrics at the top of the dashboard

3

University comparison

Compare selected universities on chosen indicators

4

Research Productivity Index

Custom metric combining three research indicators

5

Map-based analysis

See where universities are and how regions differ

6

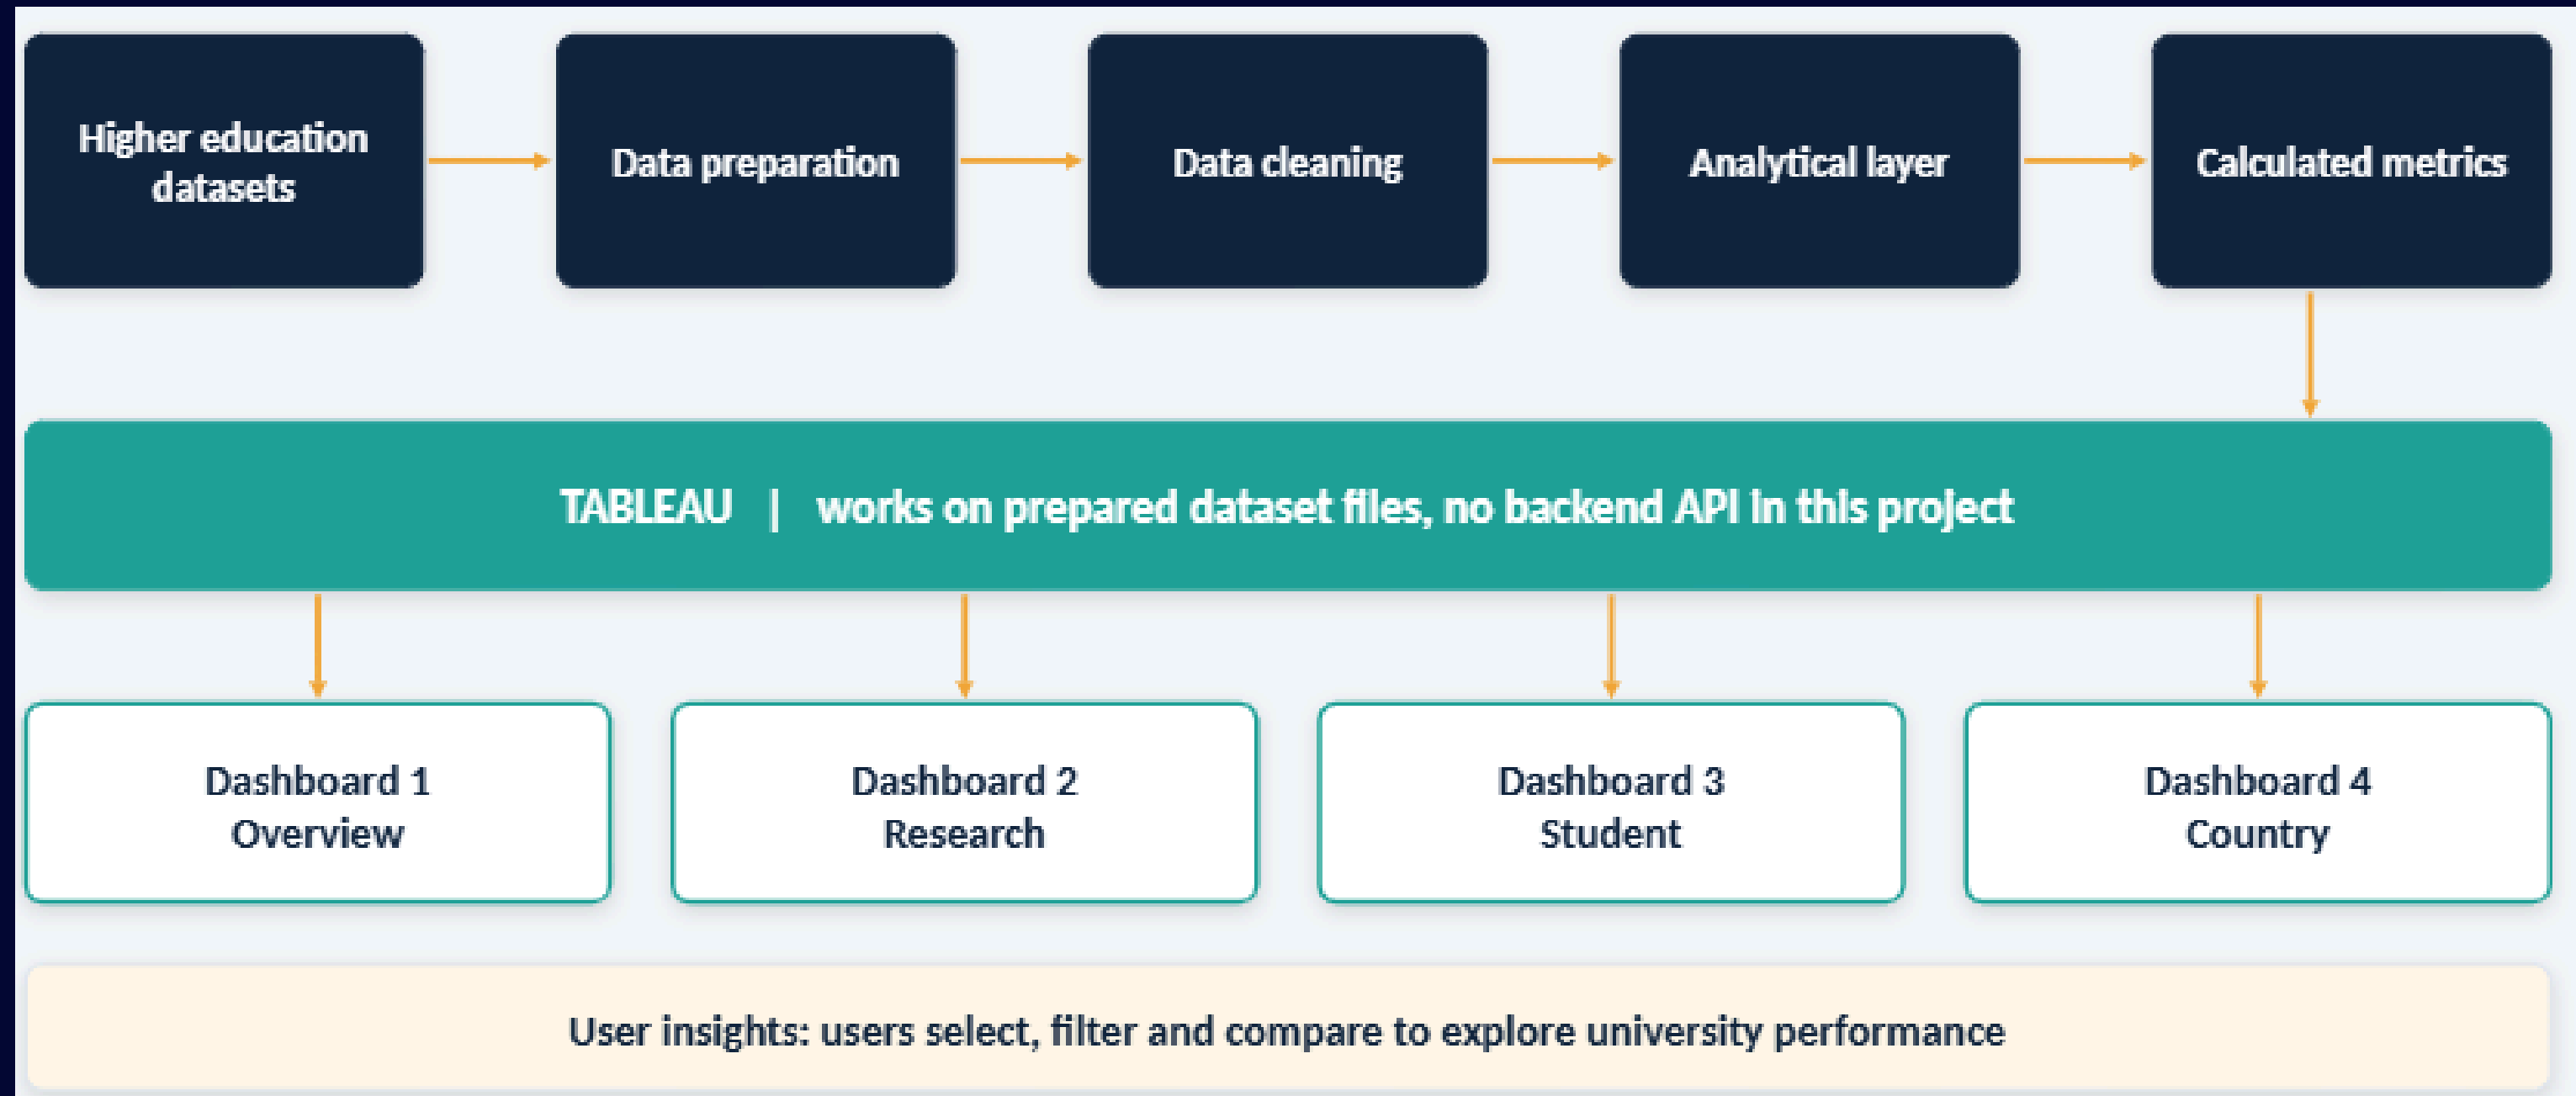

Interactive filters

Filter by university, country, region and ranking

Challenges Faced

PROBLEM		EFFECT
Many ranking indicators per university	→	Hard to understand what each one means
Hundreds of institutions to look through	→	Hard to compare universities side by side
Research performance spread across several scores	→	Hard to interpret research strength
Student-related indicators kept separate	→	Hard to analyse from a student view
Country and regional patterns hidden in raw tables	→	Hard to extract meaningful insights

System Architecture Overview

Solutions

PROBLEM

Complex ranking datasets are difficult to interpret and compare

EDUVISION_DV

Four Tableau dashboards with KPIs, charts, maps, filters and comparison views

BENEFIT

Users can explore university performance from several angles in one place

Impacts & Benefits

Project value (today)

- Students: compare universities using many indicators, not one rank
- Researchers: explore research and citation performance
- Administrators: examine performance patterns and benchmarking
- Analysts: explore country, regional and institutional patterns
- Consultants: a visual interface for exploring the datasets

Not yet built

FUTURE SCOPE

- More ranking datasets and additional years
- Automated data updates
- Predictive analytics and ML-based trend analysis
- Personalized exploration and recommendations
- Automated report generation
- Mobile-friendly experience
- More benchmarking and geographic analysis
