

EduVision_DV – Dashboard Storyboard

Higher Education Intelligence System

Purpose: Plan the four interlinked Tableau dashboards for university, research, student and country-level analysis.

1. University Overview Dashboard

Component	Planned Design
KPIs	Global Ranking Score, Academic Reputation Score
Charts	University ranking comparison, KPI comparison
Filters	University, Country, Region, Year
Navigation	Overview → Research / Student / Country
Actions	Select university to filter related views
Purpose	Provide a high-level view of university performance

2. Research Analytics Dashboard

Component	Planned Design
KPIs	Research Impact Score, Research Productivity Index
Charts	Research performance comparison, research KPI distribution
Filters	University, Country, Region
Navigation	Overview ↔ Research ↔ Student ↔ Country
Actions	University selection and cross-dashboard filtering
Purpose	Analyze research strength and productivity

3. Student Analytics Dashboard

Component	Planned Design
KPIs	Faculty-to-Student Ratio, International Student Percentage
Charts	Student ratio comparison, international student comparison
Filters	University, Country, Region
Navigation	Overview ↔ Research ↔ Student ↔ Country
Actions	University and country selection
Purpose	Understand student population and internationalization

4. Country Comparison Dashboard

Component	Planned Design
-----------	----------------

KPIs	Country-level education indicators and university KPI summaries
Charts	Country comparison, regional comparison
Filters	Country, Region, Year, Education Indicator
Navigation	Overview ↔ Research ↔ Student ↔ Country
Actions	Country selection filters university-level analysis
Purpose	Compare higher-education characteristics across countries

5. Interlinking and Navigation Plan

Navigation: A navigation menu will connect all four dashboards.

University Selection: Selecting a university will filter related analytical views.

Country Selection: Selecting a country will filter university and country-level views.

Common Identifiers: University_ID, Country_ID and Year will support consistent connections.

Interactive Comparison: Users will be able to compare universities, countries and regions using dashboard filters and actions.

Prototype objective: Verify dashboard layout, filters, navigation and interlinking before final Tableau dashboard development.
